Triple Glazing

Our triple glazing comprises of 3 panes of glass, 2 warm-edge spacer bars and argon gas creating superior performance in energy efficiency and noise reduction.

- Elite 70 windows allow for a 40mm glass unit.
- Elite 63 windows allow for a 36mm glass unit.
- The cavity created to cater for 3 panes of glass can improve sound insulation by over 20%.
- Triple glazing exceeds the efficiency of any A-Rated double glazed window.
- The centre pane of glass is toughened as standard which therefore increases security.

Over 60 different colour options including Rosewood, Light Oak and White foil to suit any home or preference
